Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's attorney, Mr. Frank L. Cire (Reg. No. 42,419) on May 27, 2009, was contacted on May 27, 2009 regarding the restriction requirement below. Mr. Frank L. Cire requested that a written restriction be made and did not elect any grouping during the phone interview.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 22-30 are drawn to discriminating whether the current and the next print job are generated by a specific application and discarding information that cause the resetting process when said discriminating that the current print job and the next print job are generated by the specific application, classified in class 718, subclass 102.
 - II. Claims 31-39 are drawn to discriminating whether the current and the next print job are generated by a specific application and combining the current and the next print job, when said discrimination that the current print job and the next print job are generated by the specific application, classified in class 718, subclass 101.
3. The inventions are distinct, each from the other because:

Invention I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to separately

usable. In the instant case, invention I has separate utility because it can be used in systems to discard information that cause the resetting process when said discriminating that the current print job and the next print job are generated by the specific application, as opposed to invention II, where combining the current and the next print job, when said discrimination that the current print job and the next print job are generated by the specific application. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CAROLINE ARCOS whose telephone number is (571)270-3151. The examiner can normally be reached on Monday-Thursday 7:00 AM to 5:30 PM.
